FEATURES

- Mustad's latest metal lure, the Mezashi Casting Jig, presents enticing erratic action with irresistible reflective patterns
- The translucent colored eye refracts lights to create an attractive natural shine in the water sure to produce a bite
- For an intense wobbling action on retrieval, this jig has been built with an asymmetrical body with a round shape to one side and triangle to the other
- The 45:55 weight distribution only increases the fierce action and unmatched presentation
- Designed in Japan with premium reflective materials
- Perfected by a Mustad UltraPoint® assist hook rigged to the front and an UltraPoint® treble to the rear

FEATURES

- Bottom-weighted for long-distance casting. The wider profile causes the jig to flutter on the drop. When it's retrieved quickly, it skips on the water like disoriented baitfish

MJIG02 DAGGERMAN JIG

Needle | 2X Long | Forged | Ringed | Duratin

FEATURES

- The Daggerman Jig is a front-weighted vertical jig best presented in short, rapid pumps with short pauses in between. Its hydrodynamic shape helps the Daggerman rip through the water column, resembling the natural movement of a struggling baitfish

MJIG04 RIP ROLLER JIG

Needle | 2X Long | Forged | Ringed | Duratin

FEATURES

- The Rip Roller Slow Fall Jig is built with a slim profile for quick descent on a tight line and its centered weight gives it a stable, but rapid rolling action on a slack line. Two contrasting colors on each side create a blinking flash that triggers strikes

HOOKS

HOOK WIRE TECHNOLOGY

HOOK FORGING EXTREME STRENGTH

At Mustad, we pride ourselves in a history of innovation that puts emphasis on the strength and durability of fishing gear, which anglers demand with the fight is on. Throughout the years, fishermen and women have depended on Mustad hooks and tackle to hold strong through propriety durable hook points to Nor-Tempered wire. Forging has been a strengthening technique for a long time, yet Mustad has engineered processes that proves once again the brand's dominance in fish hook manufacturing.

NEW

ULTRA-NOR FORGE

Our heritage in innovation has led to yet another industry-first in cutting-edge machinery designed to maximize wire strength and minimize fish loss. Mustad's patented Ultra-Nor forging technology presses a channel into the wire, strengthening the wire by increasing the diameter where it matters most. Applied to legendary Mustad hook styles, **Ultra-Nor improves pull strength up to 20%.**

STANDARD FORGE

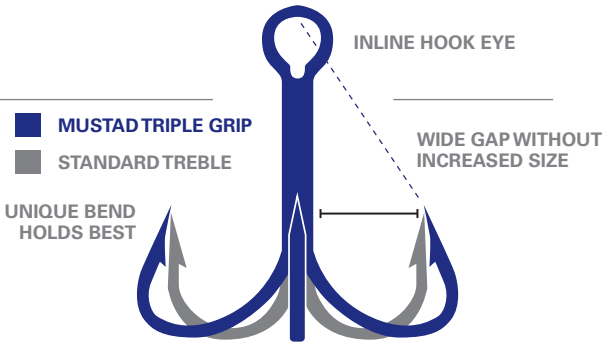
In order to increase pull strength, Mustad has utilized an effective standard forging process for a select range of hooks for many years. Without adding more material or increasing the overall diameter, forging the wire adds strength along a single plane, making this especially popular among heavy saltwater anglers. Combined with Nor-Tempering, Mustad hooks are built to be trusted.

NOR-TEMPERING

In traditional Mustad fashion, our tempering process is a careful, slow and steady process for a stronger wire. A core aspect of all Mustad hooks, the Nor-Tempering is 30% stronger than competitor wire without being brittle. Patience leads to perfection.

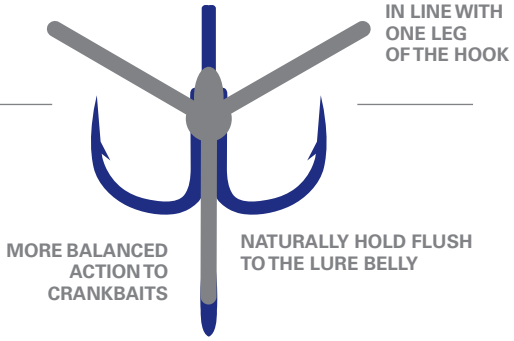
TRIPLE GRIP®

Mustad Triple Grip® hooks combine exceptional hooking and holding capability with outstanding strength. They feature a precise shape that almost "locks" a fish into the elbow of the bend, making it virtually impossible for the fish to throw the hook.



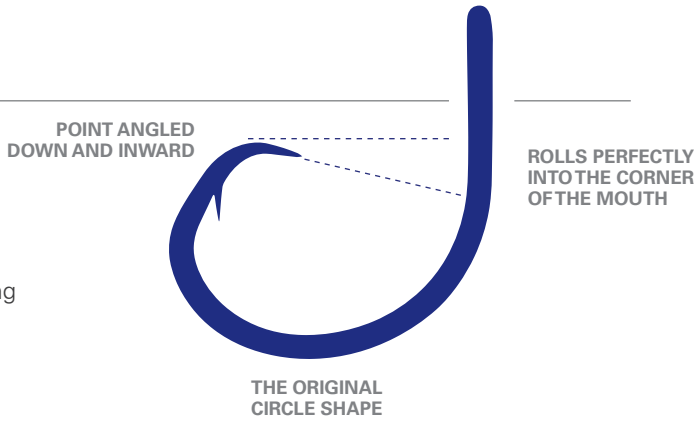
INLINE TREBLE

Made with the Mustad's proprietary automatic brazing technology, the eye is positioned inline with one leg of the hook, allowing the hook to naturally hold straight to the belly of a lure, giving a more realistic and stable suspension display. The first and only, Mustad has designed a brazing process that is done consistently by hook-producing machinery to create the best inline hook.



DEMON CIRCLE

When Mustad introduced the original circle hook, catch and release fishing changed forever. Endlessly imitated, but never matched, Mustad Demon Circle hooks have the optimal 3-degree downward point that masterfully grabs onto the fish's mouth as the hook rolls to the corner, leading in the best hook-up ratios on the market.



HOOK POINT TECHNOLOGY

CLASSIC POINT

Our legendary classic point, also known as a cut point, masters the art of durability and simplicity for anglers worldwide. The process for classic point hooks takes coiled wire into the machine, delivering a hook on the other side, just as we did back in 1877. The point is made with a cutting action twice to create the knife-like edge that penetrates over and over.

NEEDLE POINT

For anglers requiring hooks that maximize penetration ability, needle points are the only choice. Mustad's multi-stage sharpening process meticulously grinds the point to perfection to maintain as much of the wire as possible while reaching a single, ultra-sharp point tip. After the point is made, the hook-shaping machining process begins.

PREMIUM NEEDLEPOINT

OPTI-ANGLE™ TECHNOLOGY

Passion for hooks runs through our veins and our thirst for excellence drives our innovation. The next evolution of our industry-leading durable premium needlepoint technology comes AlphaPoint® 4.8. Our state-of-the-art, three-stage Opti-Angle™ sharpening technology, used to sharpen both AlphaPoint® and UltraPoint®, removes less metal from the point than traditional methods – without compromising sharpness. As the sister point to UltraPoint®, AlphaPoint® joins the hook point family as an alternate premium needlepoint, another solution to the never-satisfied task of landing huge fish. Each with their own benefits and applications, the Opti-Angle™ family will always beat the competition in durability whether fishing in the deep or amongst cover.

RIGGING VIDEO

THE PRO'S SECRET

Designed, Tested & Proven By Top Walleye Tournament Pros

TO RIG

Attach a bottom-bouncer weight to your main line. Add a 4-6 foot, 10 lb monofilament leader and attach hook. Thread half a night crawler up the hook shank over the hook eye. There should be 1/4" to 1/2" of night crawler hanging off the hook.

TO FISH

Use your trolling motor and keep speeds from 1 mph to almost nothing. The key is to keep just enough speed so the crawler spins. Can also be used effectively when drifting.

Rigged with night crawler showing underwater action

APPLICATIONS

This is a versatile, year-round Power Finesse presentation. It can be fished fast or slow, has the attractiveness of live bait and adds an irresistible action. The unique design creates an enticing corkscrew presentation. This is a slow bottom bouncing presentation technique that lets you present the bait in cracks, crevices and little corners that faster blade presentations skip over.

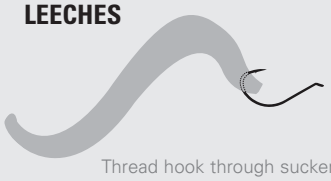
BAIT PRESENTATIONS

BEAK/OCTOPUS HOOK

Wide gap allows bait to swim freely. In-line turned up eye provides great leverage for power hook-sets. Use heavier wire hooks for bigger fish. Lighter wire hooks allow natural bait presentation.

LEECHES



Thread hook through sucker.

NIGHTCRAWLERS

Thread hook through band.

Thread on a piece, leaving one end free.

MINNOWS

Casting–Thread hook point through bottom and top of mouth.

Bobber–Thread hook under dorsal fin.

MUSTAD JIGGING ASSIST RIGS

Mustad offers a comprehensive range of options for vertical jigging tactics, featuring four rig styles in a combination of sizes to match a variety of techniques, including light, slow pitch, vertical, and heavy jigging. Along with high quality UltraPoint® hooks, we only use the best PE and Kevlar materials to produce these rigs. All rigs come dressed with either tinsel, reflective paper, or glow beads for added flash.

FLY HOOKS

MUSTAD · SUSTAINABILITY ·

INTRODUCING BIO-BASED FLY HOOK PACKAGING

To reduce Mustad's impact on the waters, our latest fly hook range has launched in bio-based plastic packaging.

Rather than plastic bags, we've chosen a durable, reusable box made of Polylatic acid (PLA) plastics, which is 100% biodegradable and compostable under certain conditions. PLA is extracted from natural, renewable resources like corn, potatoes, and beets. Not only is it made from sustainable materials, but also uses significantly less energy to produce while generating much fewer greenhouse gases.

Fly tiers will welcome the reusability of our robust fly hook boxes. Heritage Fly Hooks are packed for easy access and stack well on fly tying workbenches. Sort packs by type with the improved color-coding and specification visible where it's needed most.

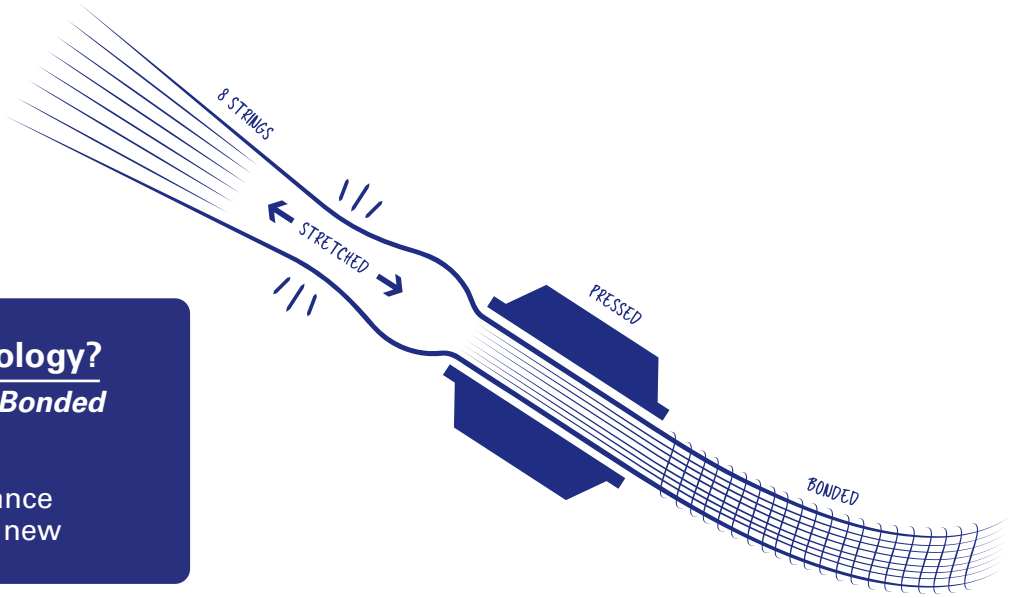
DEMON PERFECT

SPB SMOOTHLY THE STRONGEST



What is SPB Technology?

Stretched – Pressed – Bonded

- Increases smoothness
- Maximizes abrasion resistance
- Retains powerful colors as new

ML01

NEW

DEMON PERFECT BRAID

This 8-carrier braid is pre-stretched to organize and align the molecular structure of every single PE filament and additionally receives a bonding and coating process to improve compactness of the line body and link the single filaments into a 3D matrix for best possible strength/diameter ratio, reduced friction and wear resistance.

FEATURES

- SPB construction
- Ultra smooth – 8 carrier construction
- Incredible diameter / breaking strength ratio
- Longer casting
- Less friction in the water
- Near zero stretch
- The ultimate PE braided super-line

ML03 DEMON PERFECT SPJ BRAID

NEW

FEATURES

- Super smooth 8 carrier construction, giving a round profile
- Controlled stiffness for optimal performance
- Tightly woven fibres provide incredible sensitivity
- Superior tensile strength for outstanding abrasion resistance
- Near-Zero stretch
- Coloured sections of 10 meters for depth control
- Knots extremely well with line-to-line connections
